

Pro's Choice is the only manufacturer who produces soil conditioners utilizing a seven-step process. The absorbent clay is mined, sized, dried, ground into specific particle sizes, dried again, thermally optimized and de-dusted. This process is unique to Pro's Choice and ensures the highest quality products on the market today.

Because 100% of granules are ground and sized prior to the thermal optimizing processes, each granule receives the full benefit of thermal optimization. In other processes, they dry the clay before it is ground. This results in the surface being at a less than optimal moisture level, which means lower liquid holding capacities and lower absorptivity.

### Pro's Choice Infield Team

Pro's Choice products offer a whole team of products to help make your infield the best it can be. Pro's Choice Red and Pro's Choice Select soil conditioners can be used in field construction or as top dressing to eliminate compaction and improve playing surfaces. Pro Mound® packing clay can be used to construct long-wearing and stable pitcher's mounds and batter's boxes. Rapid Dry® drying agent can save the game by drying up puddles and slick spots after rain.
