

# PRE-EMERGENT TURF HERBICIDES

PRODUCT	U/M	DESCRIPTION	RATE
<b>SPRAYABLE PRE-EMERGENT HERBICIDES FOR TURF</b>			
<b>Barricade 4F</b>	1 gal. 30 gal.	Contains <u>40.7% prodiamine</u> . Selective pre-emergent provides residual control of grassy and broadleaf weeds in turf and ornamental plantings. Inhibits weed seed germination and root development with up to 26 weeks of control with one application. Excellent control of crabgrass.	10–48 oz./ ACRE
<b>Dimension 2EW</b>	2.5 gal. 30 gl	Contains <u>24% dithiopyr</u> . Dimension® specialty herbicide is the only preemergence herbicide that offers excellent early postemergence control of crabgrass. It also is proven effective for more than 45 other grassy and small-seeded broadleaf weeds.	0.37 - 0.73 fl oz/ 1000 sq ft
<b>Dimension Ultra 40 WP</b>	8 x 5 oz.	Contains <u>40% dithiopyr</u> . Pre and Post emergent control of grassy and some broadleaf weeds with minimum movement in soil. Non-staining. Comes in a water soluble packet.	2 – 4 x 5 oz pouches/acre.
<b>Gallery SC</b>	1 lb.	Contains <u>45.45% isoxaben</u> . Gallery® specialty herbicide provides superior preemergence broadleaf weed control with best-in-class ornamental and turf safety. Not only does Gallery minimize hand-weeding in landscape ornamentals and established turfgrass	0.3– 0.7 fl oz./ 1000 sq ft
<b>Pendulum Aqua-Cap</b>	2.5 gal. 15 gal 30 gal	Contains <u>38.7% pendimethalin</u> . Pendulum AquaCap herbicide offers preemergent control of grassy and broadleaf weeds in a liquid formulation, including crabgrass, goosegrass, foxtail, barnyardgrass, fall panicum, chickweed, henbit, knotweed, spurge and others. Pendulum AquaCap herbicide encapsulates a water-based formulation	1.1–3.1 oz./ 1000 sq ft
<b>Resolute</b>	5 lb 1 gl	Contains <u>prodiamine</u> . Economical pre-emergent control of certain grassy and broadleaf weeds, providing season long control.	See labels
<b>Ronstar Flo</b>	2.5 gal.	Contains <u>34.1% oxadiazon</u> . Ronstar is an excellent preemergence option for goosegrass control, in addition to crabgrass and other labeled annual weeds like annual sedge. Ronstar should be applied in late winter/early spring, prior to germination. Controls weeds through shoots, not roots.	1.85–2.8 fl oz./ 1000 sq ft
<b>Specticle Flo</b>	1 gal.	Contains <u>7.4% indaziflam</u> . Specticle Flo is a pre-emergent weed control, providing broad spectrum control of grassy weeds including poa annua, crabgrass, goosegrass and more than 60 broadleaf weeds. For warm season grasses only.	3-10 fl oz / ACRE
<b>Tower</b>	.5 gal.	Contains <u>63.9% dimethenamid-p</u> . Tower herbicide is a broad-spectrum preemergence herbicide which provides excellent control of yellow nutsedge and annual sedges along with numerous grassy and broadleaf weeds including goosegrass, crabgrass, field sandbur and spurge.	21–32 fl oz./ ACRE
